

Social Distancing Policy

In2Sport is taking appropriate Social distancing measures to reduce social interaction between children in our care. This will help reduce the transmission of coronavirus (COVID-19). Please see below:

- 1. Keep children in bubbles of 15 or below (10 in most cases). The individual coach is in charge of their bubble and will not contact another child or coach within another bubble. Each coach will deal with first aid within their bubble and is in charge of ensuring every child within their group is adhering to the rules and being safe.
- 2. Each camp will have a 'contactless' Camp leader who is not assigned a "bubble" and will be responsible for sign in/out procedures and cleaning practices. Camp leaders are the first point of contact for any issues/questions that parents may have about the camp. Camp leaders will also be the person who contacts parents/carers on any camp updates/issues. Camp Leaders will go over the camp rules making sure the children understand that camps are different to normal and go over basic COVID preventing procedures to children. Camp leaders are in charge of setting up activities & tidying/cleaning equipment after it has been used. Camp leaders are in charge of cleaning any bodily fluids that are spilled onto a camp surface throughout the day.
- 3. Each camp will have a designated area where PPE will be stored safely. Each coach will have their own set of PPE which will stay with them to be used if they need to come in to contact with a child. An example is if they need to administer first aid or tying shoes laces etc.
- 4. Children will be kept outside in the fresh air as much as possible and will wash their hands after each activity.
- 5. No parents allowed on site. Sign in desk will be set up outside and only children will be allowed to enter the venue. This is to minimize cross contamination.
- 6. To ensure consistency of bubbles, we are only accepting weekly bookings. We will group children based on booking times initially. So a 9-3pm normal day bubble and an 8-4pm extended day bubble. We will be flexible where possibly to put friends together and siblings will remain together also.
- 7. If a child starts to display symptoms we have a designated waiting area at each venue. Parents will be called immediately and asked to collect their child. They must then isolate for 14 days.
- 8. Children are encouraged to bring in as little to no items from home as possible.
